**FOR IMMEDIATE RELEASE**

### **SOLUTION BEACON GOES LIVE ON 10.2.0.2 AT ORTHOFIX**

DALLAS, TX May 18, 2007- As part of our ongoing support role at Orthofix to support and assist with stabilization of their current 9iRAC Production environment, Solution Beacon has successfully completed the database upgrade on Orthofix's 11.5.9 Production environment from 9.2.0.7 to 10.2.0.2, effective May 12<sup>th</sup>, 2007.

Project complexity was enhanced as a result of the 3 node RAC cluster running their Financial Applications (focusing primarily on Order Management, Inventory, Shipping and Planning). To top it off we had the added effort to assist in the RedHat AS3 and kernel updates to meet the 10gR2 requirements, made even more difficult by the configuration issues surrounding their Powerpath installation.

We continue to provide ongoing support and as a result of this successful upgrade are positioned for a strong future at Orthofix.
