SOLUTION BEACON

Maximize Your Business Potential

Solution Beacon combines real-life operational experience with superior functional and technical Oracle expertise. We provide intelligent recommendations to solve the most complex enterprise-wide issues. As a mid-sized international consulting firm with Big 4 expertise, we are proud of our reputation and dedication to customer satisfaction.

Recognized for Knowledge Sharing

We wrote the book! 3 books in fact. Authority on new Oracle releases. Release 12 experts. Widely recognized for mentoring. 1100 customers. Vision Instance used by 30,000 Oracle users worldwide.

Our Approach

Planning and project performance are both essential. Solution Beacon's goal is to:

- Identify strategic goals, design and plan the implementation to meet business needs
- Manage the project with minimal business interruption
- Provide high performing cross-functional and technical teams
- Complete on-time implementations that are well accepted by users and achieve the business goals set by management

Solution Beacon's Lighthouse Methodology™ provides a repeatable process to guide the project and team through discovery, build and test, training and acceptance, go-live, and post production support.

Our consultants work side by side with client teams to foster knowledge transfer. Solution Beacon's management team is actively engaged in project oversight, including Steering Committee meetings to ensure issues are identified and resolved quickly.
