**FOR IMMEDIATE RELEASE**

**SOLUTION BEACON WINS 11.0.3 to 11.5.10.2 UPGRADE  
AT CAPITAL BLUECROSS**

DALLAS, TX January 4, 2007 — The Capital BlueCross sales effort started in the summer of 2005 with a technical assessment by the elite consultants of Solution Beacon. Following the assessment, the Solution Architects went through multiple iterations to estimate the effort involved in migrating the large number of customizations and interfaces to 11.5.10.

After our initial proposal, and an internal Capital BlueCross effort to determine if Oracle Applications was the right solution going forward, Capital BlueCross requested an additional detailed assessment of their customizations resulting in a new proposal with additional work to upgrade OFA and implement DBI as well. This assessment resulted in the final proposal, which was ultimately accepted by Capital BlueCross.

The project officially kicks off next week and is anticipated to take approximately eight months from the current planning to the go-live in September, 2007.
