FOR IMMEDIATE RELEASE

**COMCAST CABLE COMMUNICATIONS, Inc. (Comcast) RAPID MIGRATION UPGRADE
for PROCURE-TO-PAY/FINANCIALS GOES LIVE on SCHEDULE!**

DALLAS, TX December 1, 2007 — Solution Beacon is proud to announce the successful completion of the upgrade and RAC implementation project at Comcast on their PROCURE-TO-PAY (Purchasing, Inventory, and Payables) and FINANCIALS (General Ledger, Fixed Assets and Projects) on August 15, 2007.

Comcast's goal was to upgrade to a high availability Oracle 11.5.10.2 system that would minimize downtime and performance issues. This project had a short timeline; in regard to its technical complexity (database from Oracle9i to 10gR2, implementation of Real Architecture Cluster (RAC) and Application Storage Management (ASM) Production AND UAT/Close environments; while implementing two Non-RAC/ASM environments for Disaster Recovery and Non-Production) and successfully went live on a 20 week project as scheduled.

Comcast selected Solution Beacon over a few other systems integrators based on our experience with RAC environments. The particular RAC configuration implemented at Comcast is rare and complex. Many thanks to all of those people behind the curtains that assisted when we needed the help.

Comcast upgraded Oracle 11.5.9 to Oracle Applications 11.5.10.2 Procure-to-Pay and Financial applications. Comcast utilizes Brio and Oracle for reporting and Applimation for Archiving. Comcast has new project initiatives that we will surely have a chance to collaborate with them on this year.

The client's high expectations continued to be exceeded through the entire implementation due to excellent participation from the Comcast personnel working together with the Solution Beacon consultants. The team was able to deliver *beyond* the client's expectations. This project has given Solution Beacon exposure at the highest levels inside Comcast.

About Comcast Corporation

Comcast Corporation is the nation's leading provider of cable, entertainment and communications products and services, with 24.1 million cable customers, 12.4 million high-speed Internet customers and 3.5 million voice customers. Comcast is principally involved in the development, management and operation of broadband cable networks and in the delivery of programming content. www.comcast.com.
