FOR IMMEDIATE RELEASE

SOLUTION BEACON MIDDLEWARE TEAM GOES INTERNATIONAL

DALLAS, TX January 9, 2008 - Solution Beacon was an implementation partner for DecisionPoint Software, a Company specializing in pre-packaged Data Warehouse content for Oracle E-Business. DecisionPoint Software was acquired a year ago by Teradata, a division of NCR, and was recently spun-off from NCR. Solution Beacon has now entered into a direct relationship with Teradata in implementing and providing staff augmentation assistance on the former DecisionPoint Software product, now renamed to Teradata DecisionExperts (TDE). To this effect, our elite consultants have recently attended a week long Teradata workshop in London, UK, to reconnect with the team we have worked with in the past, as well as to meet new team members and potential customers.

The direct result of that trip has attributed to two opportunities to Solution Beacon. First is an implementation opportunity at Saudi Telecom Company (STC) in Riyadh, Saudi Arabia (yes, Saudi Arabia).

The Solution Beacon consultants kicked off the project in early December and are headed back to Riyadh this month to work on Phase One for about 3 months; there are additional phases in the works. There are additional opportunities directly with Teradata outside of DecisionExperts for the Middle East region; and we will be exploring this in the next few months.

Our second opportunity is with O2 Networks, a division of British Telecom (BT) in London, UK. Solution Beacon has worked with some of the existing team members at O2 and BT in the past; we have highly qualified resources starting at O2 on January 7th, 2008. We are expecting this to be a long-term assignment as well.

As additional opportunities develop in UK, along with Australia, with Teradata.

Wish the team Good Luck as we move into the Global Business Environment!

About Solution Beacon, LLC

Solution Beacon, LLC, is a woman-owned business and leading provider of expert-level resources for the most widely used Enterprise Management Systems and Technologies in the world. Solution Beacon consultant resources contribute their Oracle Applications expertise to government, manufacturing, distribution, telecommunications, healthcare, higher education and finance segments of the marketplace.

About Teradata Division

Teradata (www.teradata.com), a division of NCR Corporation (NYSE: NCR), is the global technology leader in enterprise data warehousing, analytic applications and data warehousing services. Organizations around the world rely on the power of Teradata's award-winning solutions to get a single, integrated view of their business to enhance decision making, customer relationships and profitability.

About Saudi Telecom Company

Saudi Telecom Company (the “Company”) was established as a Saudi Joint Stock Company pursuant to Royal Decree No. M/35, which authorized the transfer of the telegraph and telephone division of the Ministry of Post, Telegraph and Telephone (“MoPTT”) (hereinafter referred to as “Telecom Division”) with its various components and technical and administrative facilities to the Company, and in accordance with the Council of Ministers’ Resolution No. 213 which approved the Company’s Articles of Association (the “Articles”). The Company has various investments in subsidiaries, associates and joint ventures collectively known as (the “Group”). The main activities of the Group comprise the provision of a variety of telecommunications services which include mobile, fixed local national and international telephone services, telex, telegraph and data services such as data transmission, leased lines, internet services and e-commerce.

About O2

O2 is a leading provider of mobile services to consumers and businesses in the UK. It is the leader in non-voice services, including text, media messaging, games, music and video, as well as always on data connections via GPRS, 3G and WLAN. Each month O2's 15 million customers send more than three quarters of a billion text messages. O2 (UK) is a subsidiary of O2 plc which also owns O2 branded mobile operators in Ireland and Germany as well as the O2 Airwave emergency services network in the UK.
