

**SOLUTION BEACON HAS INSTALLED RELEASE 12 WHICH IS NOW AVAILABLE ON THE SOLUTION BEACON WEBSITE**

Check it out at [http://www.solutionbeacon.com/tools\\_vision.htm](http://www.solutionbeacon.com/tools_vision.htm) and watch for an SB Newsletter announcement with more details soon.

Please note that there are some steps to install the desktop plug-in differently from Release 11i. Please also note that Release 12 requires a user to enable ActiveX and download the Sun JRE instead of the JInitiator the first time the Applications are accessed.

Thanks  
The Solution Beacon Team
