FOR IMMEDIATE RELEASE

**SOLUTION BEACON AWARDED THE CONTRACT TO UPGRADE
RESMED TO RELEASE 11.5.10.2**

DALLAS, TX January 26, 2007- Solution Beacon was able to translate a meeting with the CIO of ResMed into an assessment and contract to upgrade ResMed from 11.5.4 to 11.5.10.2 of the apps. The Solution Beacon assessment team deserves a great deal of credit with comments from the ResMed team that, in comparison to the other assessments...Solution Beacon, "far exceeded their expectations." This initial assessment solidified our reputation as the industry experts.

ResMed is a Sydney, Australia based manufacturer of sleep apnea machines, with operations and user communities spanning the US and Europe. Our effort will have a strong functional Financials and Supply Chain component across continents, meaning German and French language skills will be needed at key points in the project. Solution Beacon won the contract despite longstanding relationships with competition from offshore integrators.

Solution Beacon resources have begun Phase I planning, as well as the initial technical iteration of the upgrade prior to the holidays.

Beyond this effort, ResMed is experiencing 40% annual growth and has identified needs to implement Human Resources, Oracle Quality, and Oracle BI. ResMed has several additional international locations running separate ERP systems in need of conversion to Oracle over time.
