## Presenter Bios

**Alyssa Johnson** of Solution Beacon has numerous years of experience in project management, finance, and system administration. She is a Senior Oracle Applications Consultant with knowledge and experience in Oracle Releases 12 and 11i with a focus on E-Business Suite Financials. Her primary expertise includes providing functional support for existing financial systems as well as managing the overall implementation of new projects to ensure client satisfaction. She also enjoys presenting on Release 12 topics at local, regional, national and international conferences and is co-author of the *Release 12 Primer*. Alyssa can be reached at [ajohnson@solutionbeacon.com](mailto:ajohnson@solutionbeacon.com).

**Goetz Schmitz** has over 18 years experience with ERP-based systems and business processes. Goetz began his career with a financial and accounting background that led to several implementation roles within both consulting and internal organizations. He has worked with Oracle information technologies since 1993 in functional, project management, and practice leadership roles. Goetz has led implementations and trained clients on projects ranging from local small businesses to global Fortune 500 companies. He is currently the Vice President of Services at Solution Beacon and can be reached at [gschmitz@solutionbeacon.com](mailto:gschmitz@solutionbeacon.com) or at (630) 841-7000.

**Kevin Dahl** of Solution Beacon is a Senior Technical Consultant and Oracle Database Administrator. He has more than 24 years experience in information technology and over 20 years of experience as a database administrator. Kevin has also taught database and telecommunication courses at the university graduate level and undergraduate level. He has extensive experience with the architecture and administration of Oracle's E-Business Suite applications. Kevin has provided technical expertise for numerous upgrades and installations including Releases 10.X, 10.7NCA, 11.0.X, 11.5.X and 12.x. He also has experience with advanced options such as Real Application Clusters. He has experience implementing and configuring internet applications using Apache, Oracle 9iAS, Java, Java Servlets, and CGI programs. Kevin can be reached by email at [kdahl@solutionbeacon.com](mailto:kdahl@solutionbeacon.com).

**Susan Behn** has 24+ years experience developing, implementing, upgrading, customizing and managing enterprise applications for government and commercial industries. Susan has worked with Oracle Applications since 1993 in many technical and functional roles including system administration, development, training, project management, and engagement management. Susan presents frequently at local, regional and national conferences (OAUG/OOW/IOUG/ODTUG) on both functional and technical topics and has co-authored two books: *The ABCs of Workflow for E-Business Suite Release 11i* and *The Release 12 Primer*. Susan is currently the Vice President of Technical Delivery at Solution Beacon and can be reached by email at [sbehn@solutionbeacon.com](mailto:sbehn@solutionbeacon.com).

**Anand Adya** is founder of Greenlight Technologies and has sixteen years of deep and varied experience with key aspects of technology including

Founding employee with two successful technology start-up companies prior to Greenlight  
Positions in Management Consulting and Venture Capital

MBA from The Wharton School of the University of Pennsylvania, and degrees from PGDM  
(Indian Institute of Management)

Anand is a frequently-requested speaker at industry conferences, seminars, and executive forums on topics related to global GRC compliance for corporations with incompatible, mission-critical application platforms. Greenlight's software connects these platforms into a cohesive, compliant system. Greenlight has experienced rapid market acceptance among leading global corporations and institutions in regulated industries. Headquarters are in Flemington, NJ with sales offices in Atlanta, FL, TX, and CA. Greenlight's development facilities are located in Pune, India.

**Grant Chen** of UC4 Software has over ten years of experience leading implementation teams on enterprise-wide business transformation projects. He is well versed in project management, business process reengineering, implementation methodologies, solution design, development, and delivery. Mr. Chen has consulting experience with EDS, CSC, and Capgemini implementing Oracle E-Business Suite projects for Fortune 500 companies.

**Eric E. Popiel** has more than 25 years of industry experience. Eric started his career in IT working in the Retail, Insurance and Financial industries. For the last 15 years he has worked in Enterprise Software applications space for vendors including Vantive, Oracle, PeopleSoft, Ariba, and JD Edwards. Eric managed OuterBay's Worldwide pre-sales engineering resources for Database Archiving and now is the Director for Hewlett Packard's Information Management Pre-Sales for the Americas. He is a frequent presenter at local, regional, and national conferences. Eric can be reached by email at [eric.popiel@hp.com](mailto:eric.popiel@hp.com).
